

JASPER

about

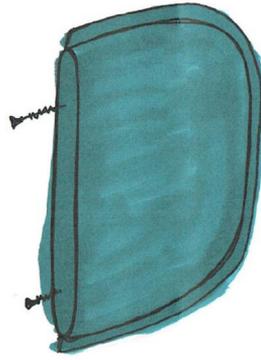

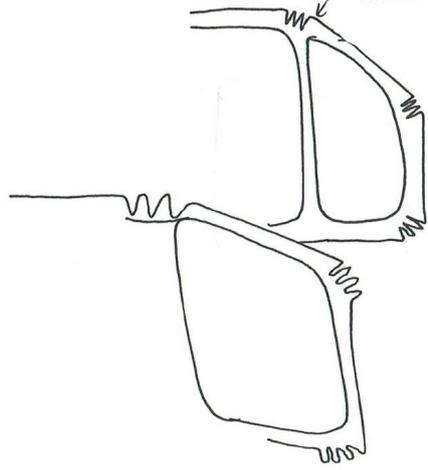

We are Acustio. We design and manufacture acoustic furniture solutions for the modern office.

Our sound-absorbing panels are work-friendly by design. Just imagine how comfortable work will become with our desk dividers, wall panels, free-standing room dividers and phone booths, to name just a few.

Acustio's flexible and functional solutions mean a shared office space can retain intimacy and a productive peace and quiet. It becomes surprisingly free from unwanted distractions, such as conversations, phones or noisy printers.

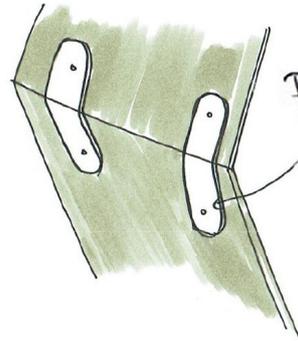

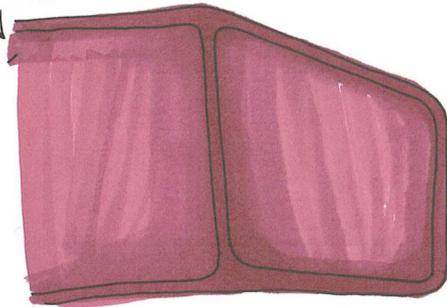

Our values are simple. All Acustio products are handmade with love and crafted to perfection, and attention to detail is what we do take pride in.

HOLDING

SAME FORM

Jasper simplifies the process of making things simple. It works in two directions: the standalone, vertical room dividers make cozy spaces out of open spaces. The horizontal, desktop partitions make the smaller spaces even cozier. The hanging panels work in the background. They make all spaces cozy.

It is a family of sound absorbing furniture that will make effective work a more inspiring, pleasurable experience. Covered in high-quality seamless upholstery, they evoke a feeling of intimacy and coziness. An easier focus and a clearer mind are now literally at at one's fingertips.

JASPER ROOM DIVIDERS

Covered in high-quality seamless upholstery, the free-standing room dividers inspire a feeling of intimacy and coziness. They are by design made to add a sense of individual space that makes it easier to focus on the work ahead. Toned-down and refreshingly quiet for a surprisingly effective working experience, they make your day, every business day.

JASPER DESKTOP

Our dedicated adapters work with desks from the world's leading manufacturers. We also design universal solutions for a number of branded and non-branded desks.

Pictures, notes and small objects can be pinned to the surface of Acustio's behind-the-desk panels. There is an amazing choice of sizes, colours and types of fabric for the high-quality seamless upholstery.

JASPER MOBILITY

The mobile desktop partitions can be sat on the surface with no need for screws, allowing for complete freedom and flexibility. They are a perfect solution to meet the needs of smaller project groups, privacy-wise. Dedicated working space can be arranged instantly!

JASPER WALL

Acustio's Jasper wall panels work hard to reduce the echo in larger spaces, such as conference rooms, vast open-space offices or halls. They can be easily attached to the surface using a strong and reliable, yet removable mounting system. Cubic metres of warmth and coziness are guaranteed in any space.

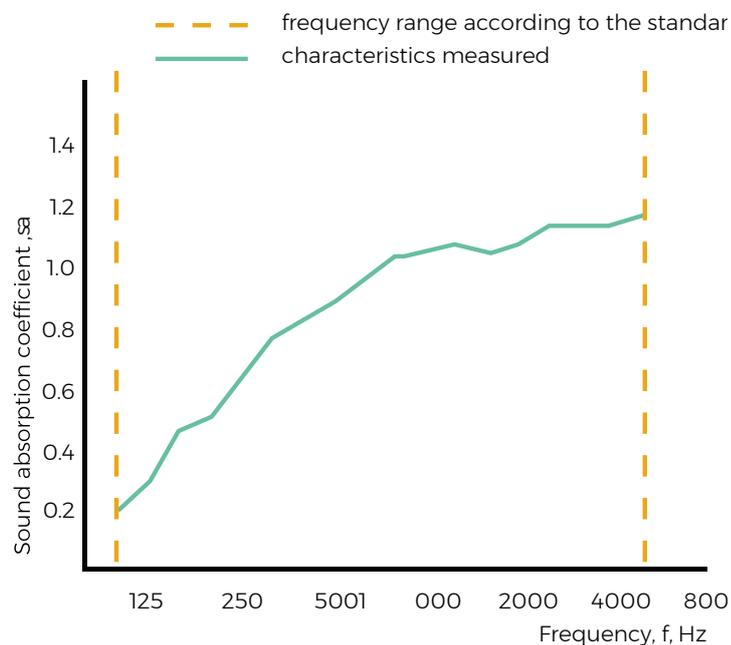

JASPER CEILING

The Jasper family includes ceiling panels which can be fixed at various heights, and the choice of beautiful colours is astonishing. Available in three shapes: round, square, and rectangular, the panels will add a touch of art to a cozy, modern office.

ANALYTICS

Frequency f [Hz]	T1 [S]	T2 [S]	α_S	α_p

MIDDLE LAYER COLOUR

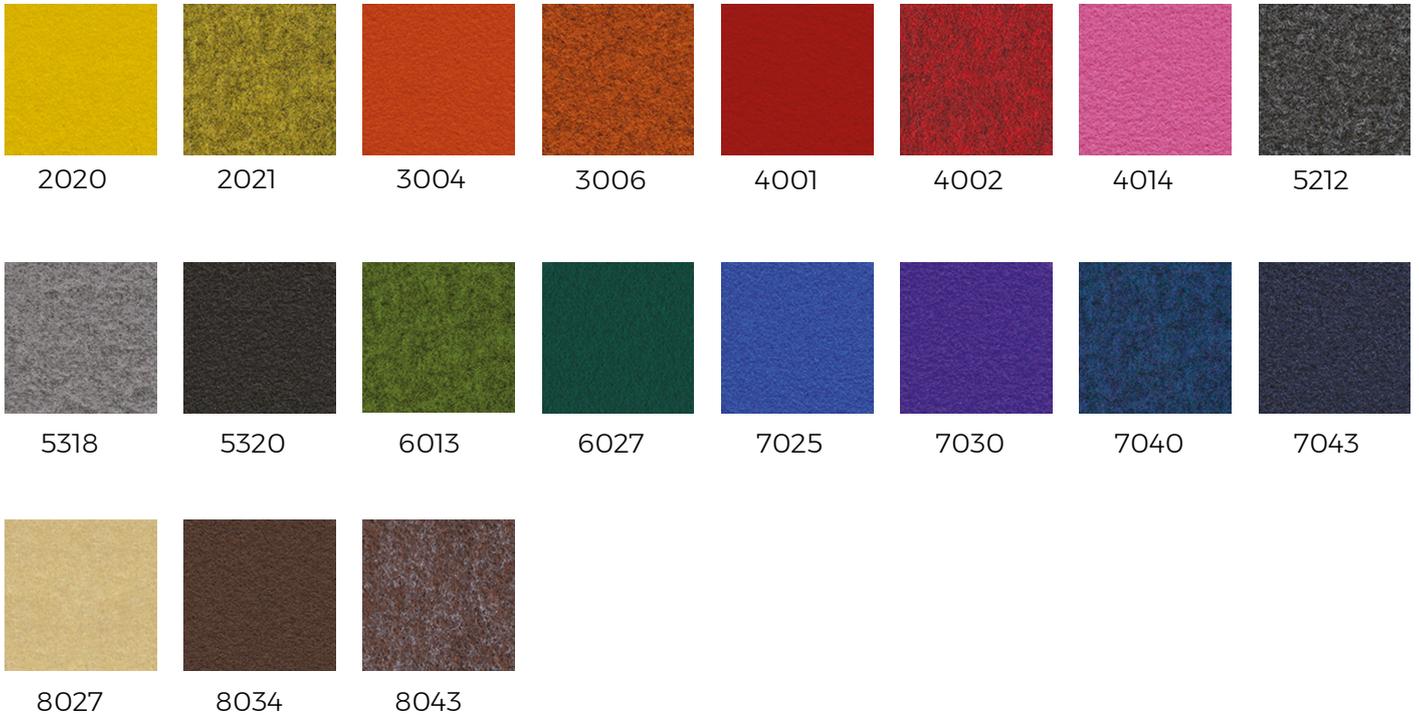

Jasper lets you choose the colour of each of the three layers of its upholstery.

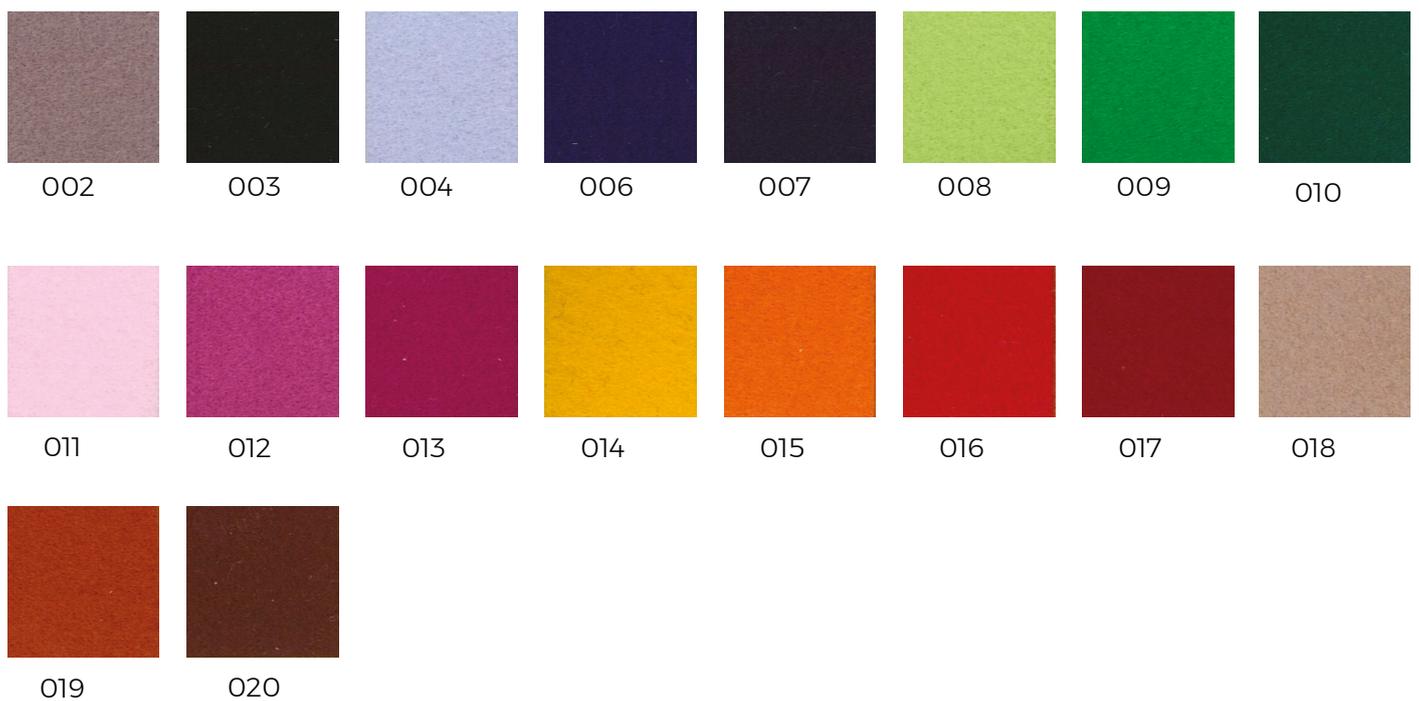

And thanks to the Acustio's signature solution, now even the hue of the inside layer can be selected. A myriad combinations can be achieved that will perfectly reflect the Client's branding and the emotions that it embodies.
