---

**about**

We are Acustio. We design and manufacture acoustic furniture solutions for the modern office.

Our sound-absorbing panels are work-friendly by design. Just imagine how comfortable work will become with our desk dividers, wall panels, free-standing room dividers and phone booths, to name just a few.

Acustio's flexible and functional solutions mean a shared office space can retain intimacy and a productive peace and quiet. It becomes surprisingly free from unwanted distractions, such as conversations, phones or noisy printers.

Our values are simple. All Acustio products are handmade with love and crafted to perfection, and attention to detail is what we do take pride in.

## THE PANEL.

Endlessly bindable and flexible beyond reason, the Rocks panel stands firmly on its Boomerang feet. It shares Acustio's Heaven Booth philosophy so that any number of panels can be connected for unlimited comfort.

Designed in two heights (130 and 160 cm), the panel is the perfect ingredient of Rocks Wall, Rocks Desk (available in four different variants), the Cave (additional privacy within the office), and Rocks Sofa. Distinctively original and compellingly minimalist, they help create meeting spaces for smaller teams to sit down in comfort and talk in privacy.

# ROCKS WALL

---

A flexible room divider, Rocks Wall can be shaped in a variety of ways - a circle, for example - for a deeper peace and quiet both inside and outside the enclosure. More focus and creativity make work sound perfect.

# ROCKS CAVE

---

The high walls make it an island that perfectly fits one or two persons with a sense of necessary privacy. It is an on-demand solution that guarantees additional comfort and relaxation.

# ROCKS DESK

---

Simple and functional, Rocks Desk is available in four different options - standing or sitting, the walls either converging or diverging. A revolutionary concept that sits well with everyone around the office.
