About us

At Hush, we believe a **balanced acoustic environment** should play a key role in contemporary interior design.

Sound has always been with us. Yet, with the technological and economic development, more and more sources of unwanted noise disturb our daily lives. The latest trend in design - large open spaces - fosters collaboration, but also creates sub-optimal acoustic environment. An environment where all background noises of conversations, ringtones or printers subconsciously distract us.

Hush offers acoustic panels that reduce unwanted noise in all types of interiors. We make sure our products are simple, adaptable and of high quality.

Following our motto - **the art of silence** - we are here to marry noise reduction with timeless, sustainable design.

Simplicity

We are what you see. From design to application, our products are made as pure as possible so that they do well what they are created for.

Adaptability

Our portfolio of products gives the flexibility to create unique solutions that fit the style and acoustic needs of every contemporary interior.

Quality

By choosing the finest materials and combining machine precision with handcraft finish, we ensure reliability and authenticity of our products.

Acoustic report - Blocks panels by Hush | $\alpha_w = 1,00$ (class A)

Together with experts in acoustics, we develop products that meet the highest standards in absorbing, blocking or diffusing unwanted noise. Our panels are certified by

an independent acoustics laboratory as the best sound absorbers (class A).

From the best performing melamine foam to recyclable and fire-resistant fabrics, we carefully select the finest materials for our panels.

Our production process provides the precision of the most innovative machines combined with a handcrafted finish.

We believe great performance and quality need to go hand in hand with style. To transform simple technical products into works of art, we collaborate with renowned designers. Our pure lines suit all environments where we work and socialize.

Designers

Current Hush collections have been designed by **Paul & Kate Brooks**.

Paul and Kate Brooks are English Designers living in France and working together from their studio in Germany. Both studied design in London - Paul at the Royal College of Art and Kate at St Martin's College. They design products with a quiet clarity and an artful twist

for clients in Europe and North America. Their designs have gained international recognition with awards from organisations such as IF, Good Design Award, Red Dot and Neocon.

Blocks

Design Paul & Kate Brooks

Blocks is an incredibly versatile family of acoustic wall and ceiling panels. Five classic shapes in various sizes and two thickness options offer endless configuration possibilities. With Blocks you can keep it calm and make a simple repeat pattern, or let your imagination run free to create a complex piece of „art“.

Blocks offer an option to mix different colours of the same fabric on front and side of the panel.

The BLOCKS range has been developed together with an experienced acoustics laboratory and is certified as the best sound absorber (class A, absorbing 100% of unwanted noise).

Let your **imagination** run free.

Wall panels

Puzzle

Design Paul & Kate Brooks

Puzzle is a range of acoustic wall panels inspired by the classic jig-saw shape. The design offers a series of five puzzle pieces. By combining these elements you can build infinite tableau structures or link random pieces in free style. Stylish, fun and reassuringly familiar.

The core of Puzzle panels is made of a specialistic melamine foam, which has outstanding acoustic properties. Puzzle panels are certified as class A sound absorbers.
