Comforto 59

Product Sheet

COMFORTO 59

INNOVATIVE FUNCTIONALITY

FORGET THAT YOU'RE SITTING

Each individual is unique: size, weight, posture, and daily tasks are just a few factors at play in defining the right solution for your task chair. The solution: Comforto 59's automatic weight control mechanism transfers the user's body weight via an articulated system to the backrest, which then provides the perfect counter pressure to ensure balanced, dynamic seating comfort.

The art of sitting comfortably without getting tired is a dynamic process which is influenced by a number of external factors. Finely tuned controls are integrated into the seat frame and their clear pictographic design makes adjusting the seat a straightforward task.

Clean and simple lines, together with the lightly concealed and innovative functionality of the automatic weight control, lend each individual sitting experience its own dimension. Comforto 59 is part of a new product generation of the future which can be easily adapted to suit any work environment.

DETAILS

DESIGNER Simon Desanta and Haworth Design Studio
