SAYL CHAIRS

**Live Unframed**

People at their best live unframed, going beyond expectations to surprise and delight us.

With SAYL, we set out to design and build a chair family that gives form to that spirit.

Working with designer Yves Béhar, we created a design as affordable as it is inventive.

## Inspired by Suspension

Béhar began by looking at examples of design that deliver the most with the least. He wondered: Can the same principles that suspend a bridge over water be applied to a chair? The answer was yes, the result is SAYL.

### 3D Intelligent™ Technology

Our work with Yves Béhar achieved a breakthrough in seating technology. The SAYL full-suspension back is literally frameless. It encourages a full range of movement while seated, supporting the body all the while.

No frame means no hard edges. Support is molded directly into the strands, more in areas that need it, less elsewhere for freer movement.

Vertical (A) and horizontal (B) elastomer strands vary in thickness. The strands provide appropriate levels of support and flex for the spine.

## SAYL Family

Our passion for finding better ways for everyone to sit guided the development of SAYL. Our effort resulted in a family of chairs.

Work chairs in a mid-high back feature the 3D Intelligent suspension. Upholstered work chairs include mid- and high-back models. Side chairs—in four-leg or sled base—come in suspension, upholstered, and plastic backs.

### **Color Your World**

SAYL color choices contribute to the chair's visual lightness and transparency. And give you plenty of room for personal expression. The organic shape of the SAYL back makes it elegant anywhere, from office to home.

## Body of Comfort

For over 75 years, we've immersed ourselves in the art and science of seating. SAYL reflects that passion in the inventive ways it supports the body.

## Work Chairs

Suspension : Upholstered

The chair's distinctive Y-Tower™ structure provides the connection points for the suspension back. It is the foundation of the chair's distinctive arc, which mirrors the curvature of the spine.

The foundational shell of the upholstered work chair mimics the 3D Intelligent suspension. That gives the upholstered chair a healthy balance between support and freedom.

An optional lumbar support for the upholstered work chair provides adjustment over a four-inch range.

Height-adjustable arms move vertically over a four-inch range. Fully adjustable arms move vertically, as well as front to back and inward and outward.

Support is molded directly into the 3D Intelligent back material. That support is greater in areas that need it—sacrum, lumbar, and spine—lesser elsewhere for freer movement.

The back supports the transition area from the thoracic to lumbar areas and again between the lumbar and sacral areas. “Hinge points” allow these areas to flex and adapt to each individual while supporting the healthy, forward rotation of the pelvis.

The ArcSpan™ along with the arm structure and tilt mechanism are fused into a single triangulated part. Its strength reduces the chair's material requirement and weight.

**Eco-Dematerialised™ Design**

In creating SAYL, we used fewer materials in inventive ways to make the chair attainable for more people. Fewer parts and less material ultimately mean less cost and a smaller carbon footprint needed to make SAYL chairs. And, we produce them on three continents to cut the distance between factory and buyer. When not blanket wrapped for shipment, SAYL chairs ship ready to assemble in half-sized boxes.

**Single Part**

The ArcSpan seat base, arm structure, and tilt mechanism undercarriage are fused into one, strong part; this single part reduces the chair's material content, as well as its visual "weight."

**Sculpted Strength**

The Y-Tower structure is sculpted and hollowed out to achieve the most strength with the least amount of material.

**Essential Forms**

Controls are expressive and tactile. Just as important, they are refined until only their essential forms remain.

**Materials**

The color realm of SAYL begins with a base color choice combined with expressive to classic colors for the seat, back, and armpads. Colors and materials can be mixed for a bold look or aligned for a more traditional approach.

**Design for the Environment:**

- Up to 93 percent recyclable; contains no PVC
- Eco-dematerialised™ design uses fewer materials in inventive ways
- MBDC Cradle-to-Cradle™ Silver, GREENGUARD®, and level™ 3 certified

**Designer:** Yves Béhar

**Warranty:** 12-year, 3-shift

**General Dimensions**

**WORK CHAIR**  
**A** height: 34.25-38.75 in.  
**B** width: 24.5 in.  
**c** depth: 24.5 in.

**SIDE CHAIR**  
**A** height: 34.25 in.  
**B** width: 24 in.  
**c** depth: 22.5 in.

**SAYL CHAIRS [hermanmiller.com/sayl](http://hermanmiller.com/sayl)**

- The 3D Intelligent™ suspension back gives freedom of movement and proper support.
- A simple design and expressive color choices let SAYL slip elegantly into any space.
- Being inventive yielded a chair that achieves a higher standard while using fewer materials.
- As affordable as it is original, SAYL typifies our belief that everyone deserves a good chair.

**PART OF THE THRIVE™ PORTFOLIO**

Our health-positive products help people work at their most safe, effective, and motivated levels, so everyone can thrive.
