BACHMANN FACILITY SYSTEMS

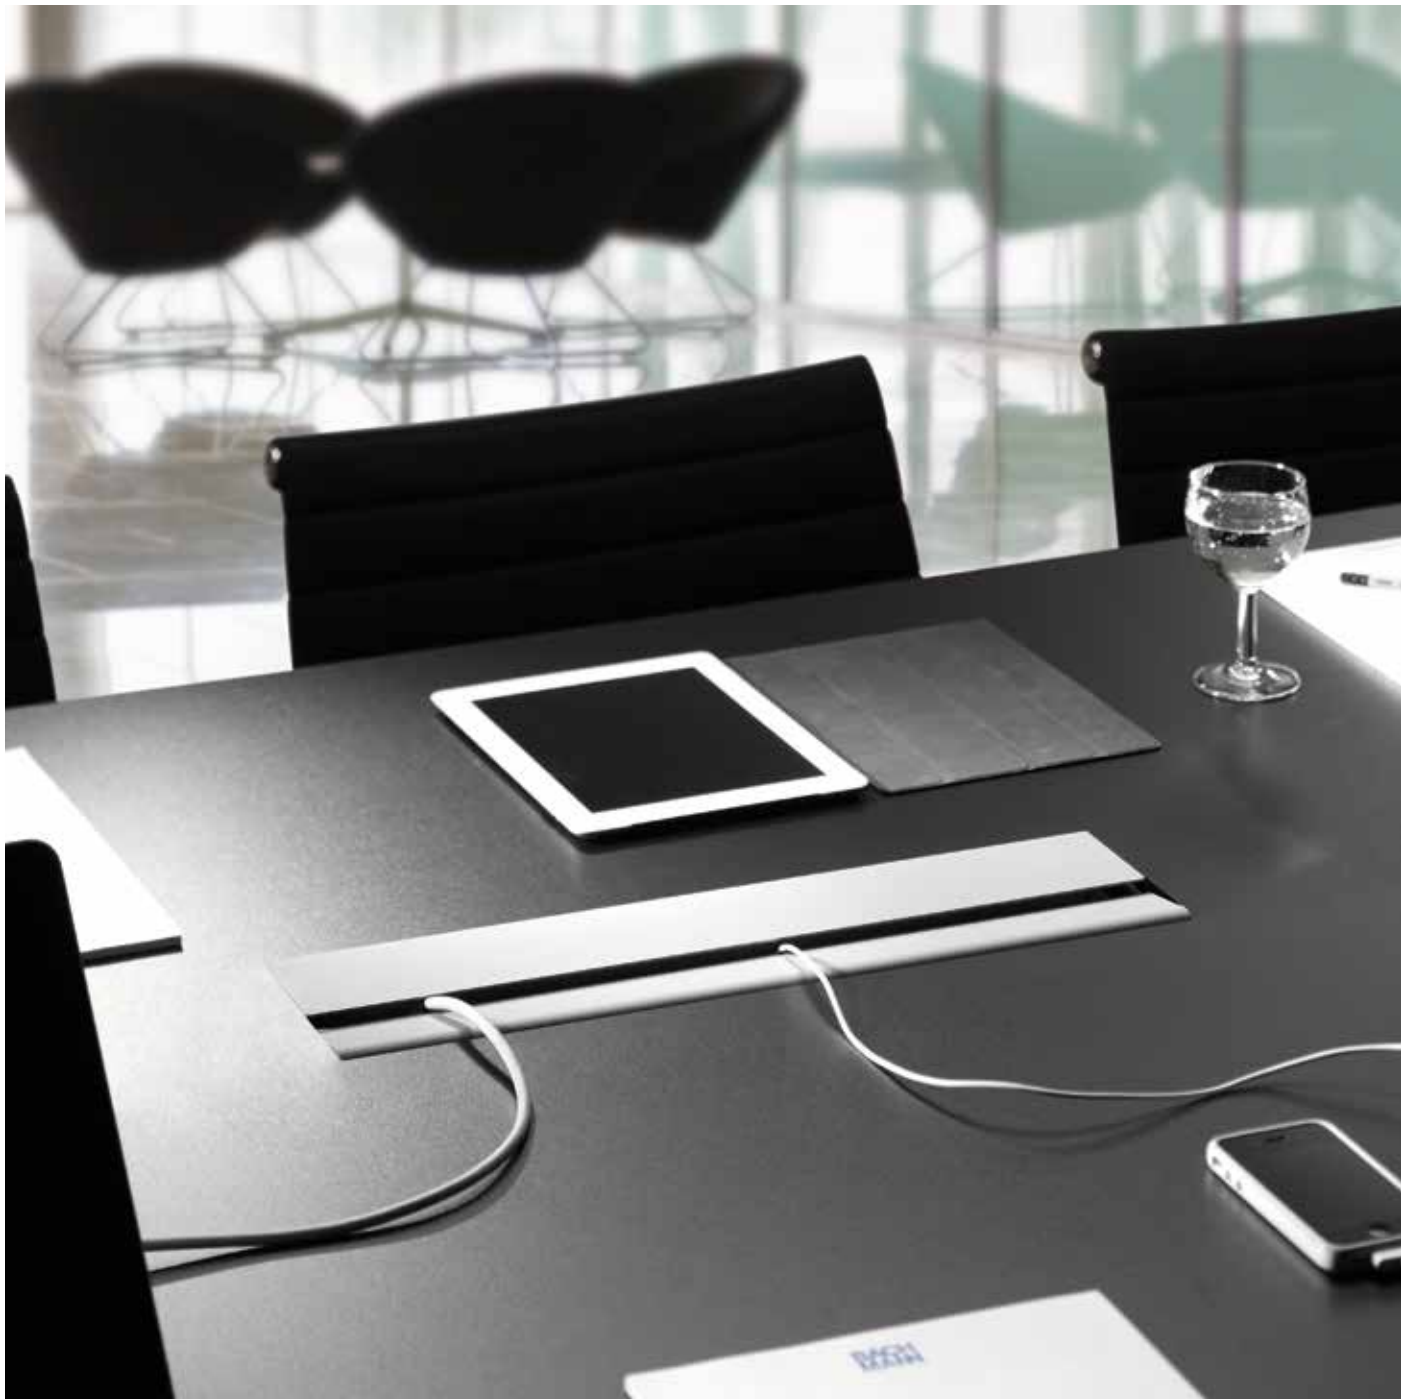

Plug into a world of opportunities

With Bachmann Facility Systems, you can be sure of having access to the best connectors and connections wherever you are in the world. Our systems are configurable with all standard international socket outlets and data connections. Modules can be retrofitted or interchanged quickly and easily. In short, when it comes to energy and data management systems that are fit for the future, Bachmann maximizes your options. There are however two areas in which we offer no flexibility: our high-quality design and our consistent quality.

CONFERENCE

Setting a design standard

High quality material and finish // User-focused flap technology // can be closed once cables have been connected // for additional and flush justified mounting

TOP FRAME

Perfect elegance

Smart design // flaps in different finishes // soft and silent opening // access to power supply and data from any seat

CONI

Integrated functionality

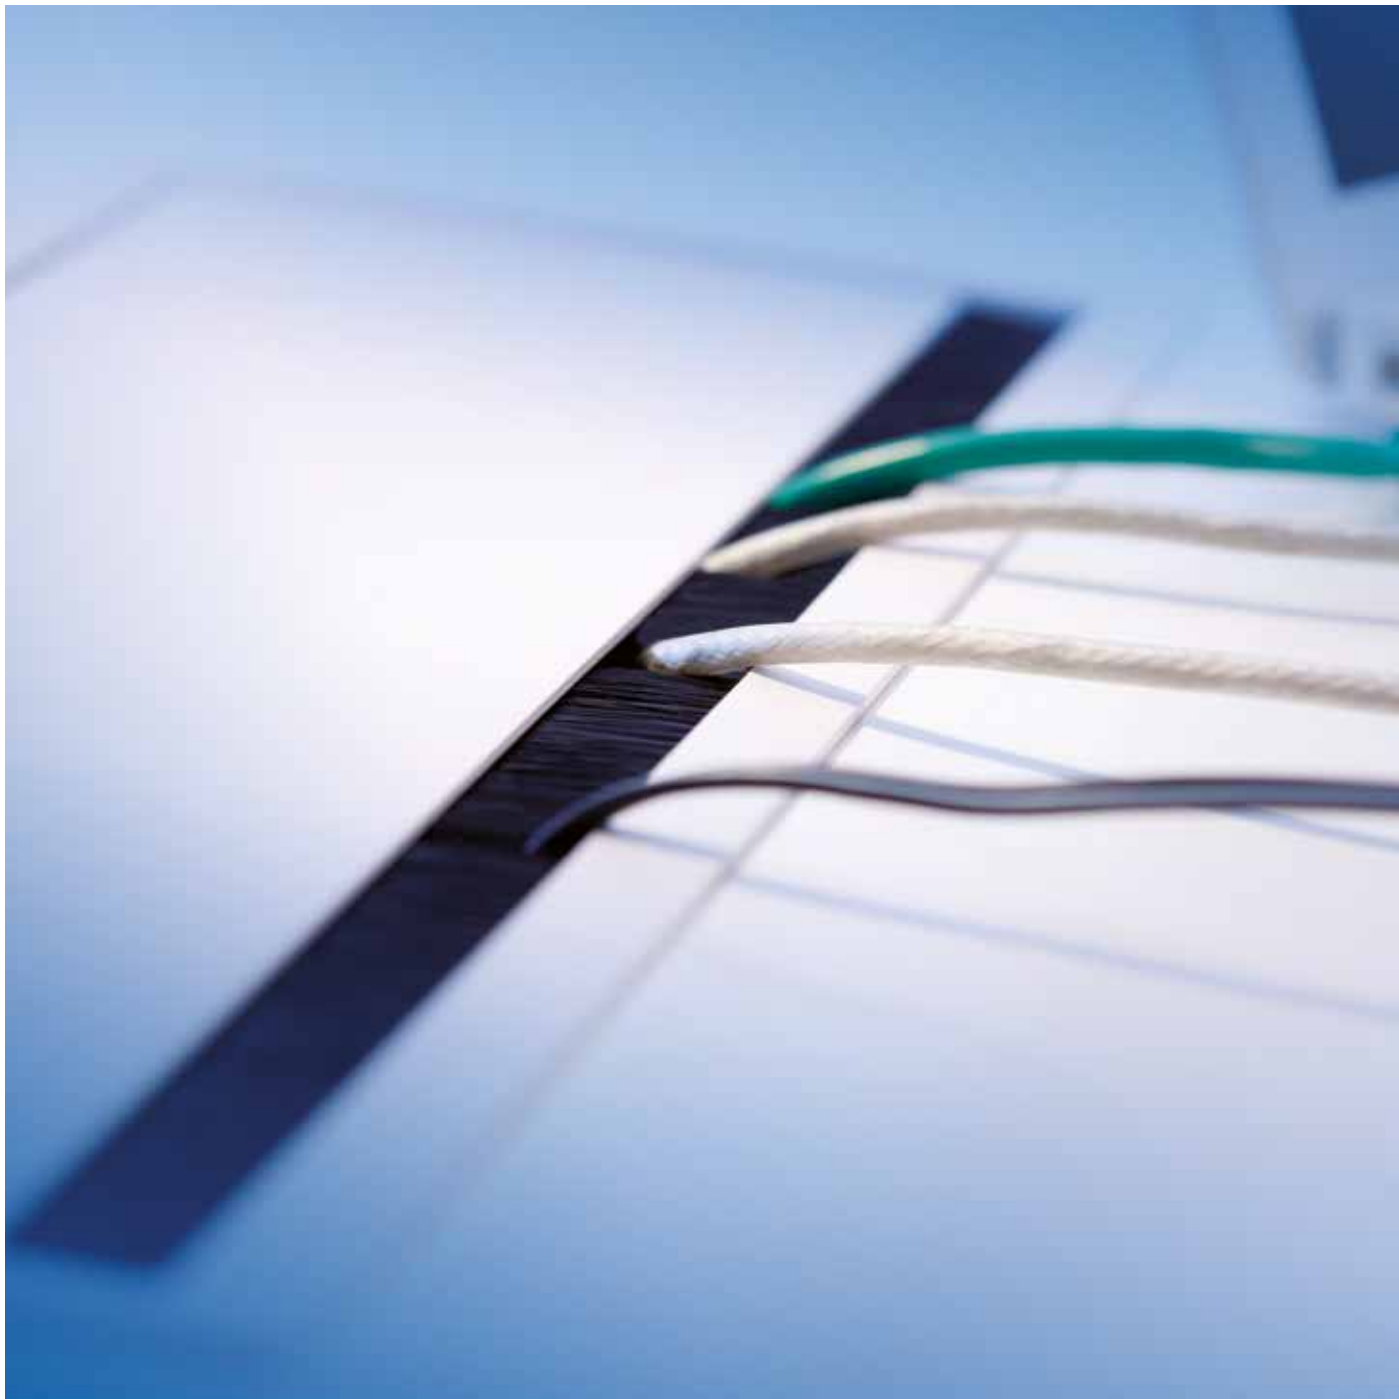

Metal frame and flap // closeable flap while devices are connected due to brush inserts // minimum built-in depth // easy installation

CONI COVER

Easy access

Same cover design as CONI, but without socket outlet // provides easy access to cable duct systems

POWER FRAME

Compact and efficient

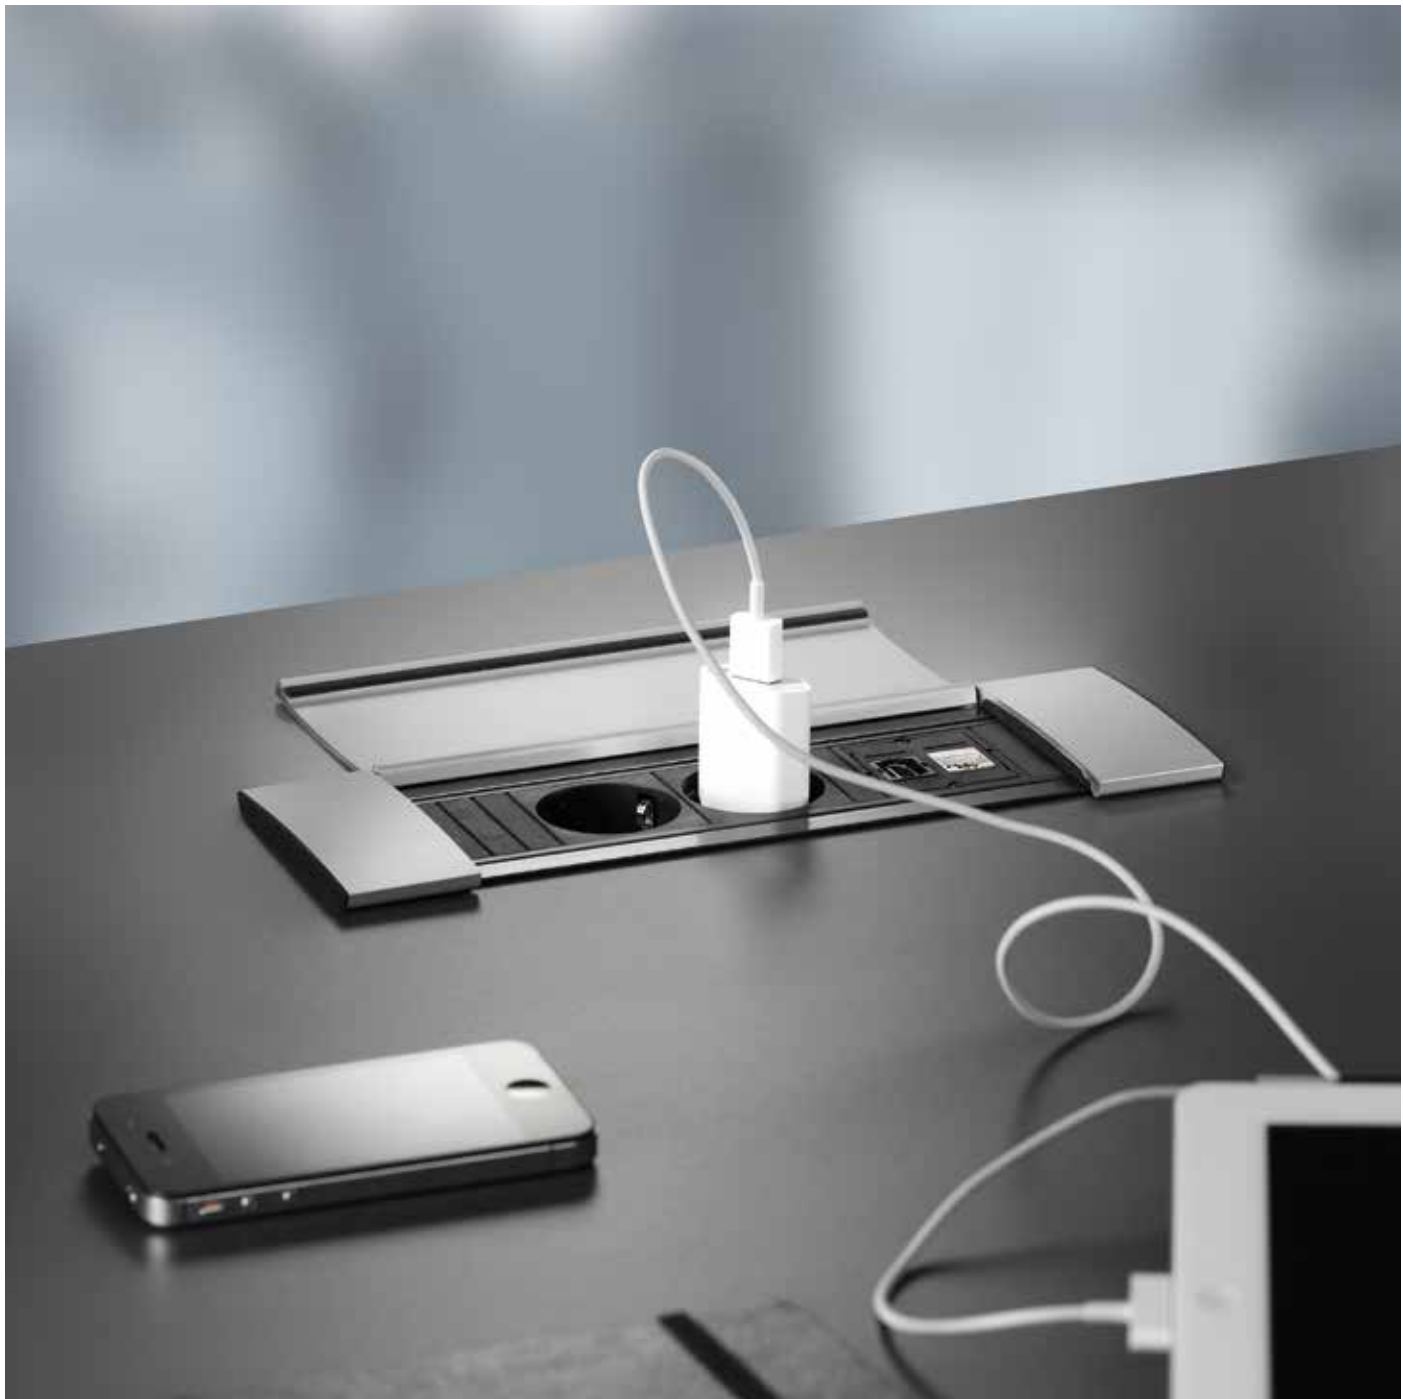

Compact dimensions // easy and rapid installation // versatile applications // enduring design

POWER FRAME COVER

Finally power found elegance

Anodized aluminum flap // for conference and office tables // various combinations // access to power supply and data from any seat

TWIST

What goes around comes around

interior
innovation
award
2014
Selection

reddot design award
winner 2012

Minimum built-in depth and compact design // innovative handling // easy and rapid installation // stainless steel or matt chrome //
Red Dot Product Design Award Winner 2012 // Interior Innovation Award Winner 2014

ELEVATOR

The elevator is powered straight away

Press down with your thumb to raise // several configurations // suitable for standard 79 mm hole // quick and easy to install // suitable for retrofitting // aluminium nickel-plated, brushed // for desk or table top thicknesses of 16 - 60 mm

LIFT

High-tech in motion

Automatic lifting system // smart design // access to power supply and data from any seat // low built-in depth

DESK 1

Versatility with style

Power and data supply solution for standard workplaces // flexible use // various installation possibilities // sustainable due to custom modules

DESK 2

Design meets technology

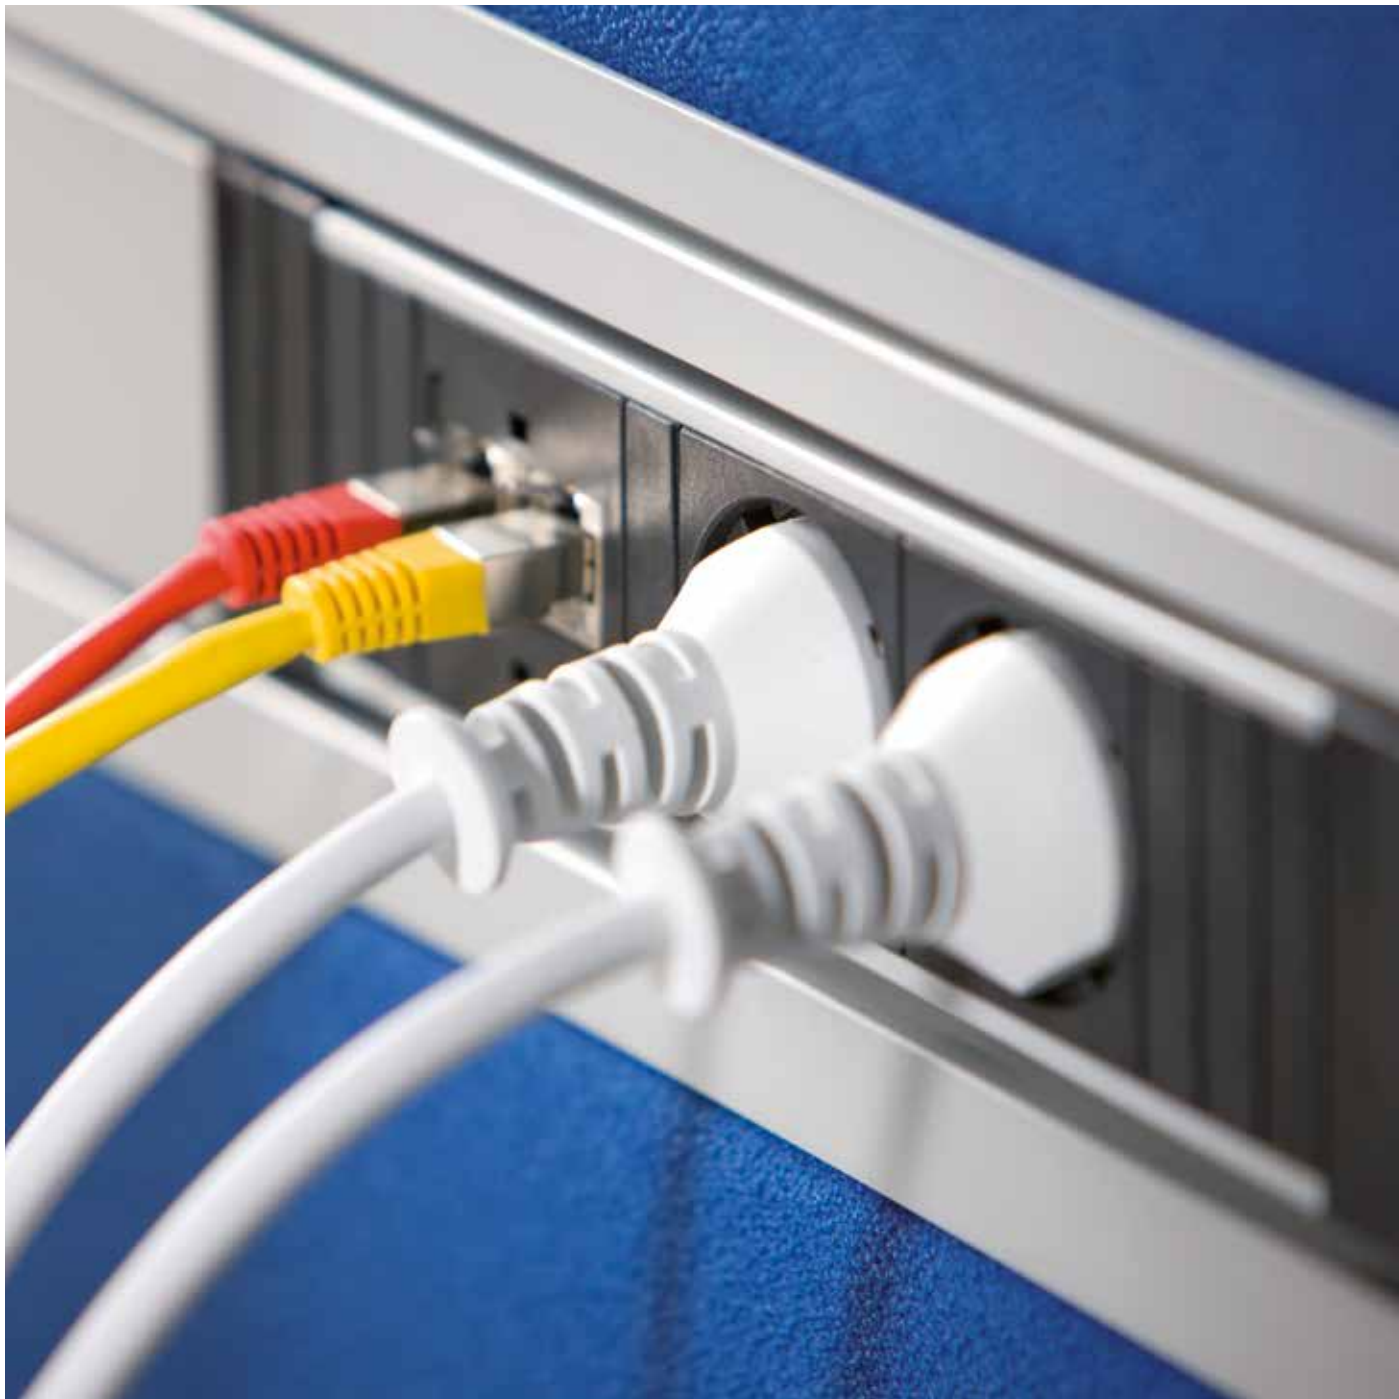

reddot design award
winner 2011

Design solution for modern workstations // user-friendly 35° orientation // covered cable duct to the edge of the desk //
Red Dot Product Design Award Winner 2011 // IF Award 2012 Winner // nominated for the German Design Award 2012

STEP

Fit for the future – step by step

CUSTOM MODULES

For custom configuration

The Bachmann system for sustainability // for data, video and audio connections // can be used in facility systems, racks and electrical installations // integration with the switch product ranges of leading manufacturers // easy to connect via socket/socket or screw terminals

LanLight®

Modular installation for flexible supply to office workstations

reddot design award
winner 2011

Delivers exactly what is needed to each workstation // provides power, data and media connections and lighting //
modular and multifunctional – from cable connections from the floor box to mobile power columns (with or without light fittings) //
attractive, harmonious visual design

MEDIA TECHNOLOGY

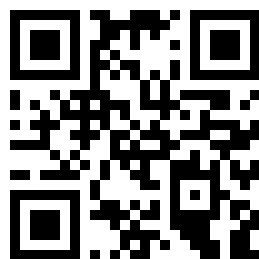

Signal distribution made easy

Simple plug-and-play principle // electronics are already integrated in the connection panel // pre-fitted cabling // extension of image, sound and network signals // compact and space-saving units // chain or star cabling
