

Wall panels

Hanging panels

Blocks

Design Paul & Kate Brooks

Blocks is an incredibly versatile family of acoustic wall and ceiling panels. Five classic shapes in various sizes and two thickness options offer endless configuration possibilities. With Blocks you can keep it calm and make a simple repeat pattern, or let your imagination run free to create a complex piece of „art“.

Blocks offer an option to mix different colours of the same fabric on front and side of the panel.

The BLOCKS range has been developed together with an experienced acoustics laboratory and is certified as the best sound absorber (class A, absorbing 100% of unwanted noise).

Let your **imagination** run free.
