FS-Line. 21 range

Timeless form.
Durable quality.
Easy handling.

The FS-line swivel chair is a classic in the world of office chairs. The epitome of dynamic seating for almost 30 years, its ease of use is its key to success. Over two million chairs sold worldwide are testimony to the ingenuity and modern appeal of the FS concept.

Three swivel axes are designed to allow the seat, backrest and armrests to follow any movement and change in posture. The combination of flexible swing plates and extremely elastic shell provides support and options for adjustment in any posture. The mechanism is infinitely adjustable, fully automatic and includes sideways torsion elasticity in the backrest.

The FS line is designed as a broad product family for equipping all areas in a company. As a result, furnishings are coherent and enhance corporate identity.

The modular structure of the shell and frame makes repair and maintenance simple. Each chair can be upgraded with little effort. The FS-Line is the perfect example for a benchmark in sustainable product design. The durability of the high quality materials, the innovative seating concept and the classical, understated design guarantee the chair will last decades.

FS 211–213
The compact 211–213 models, with the typical, rounded seat shell, are a perfect choice for work, conference and training environments.

FS 218–219
The spacious 218 and 219 models, with the angular design of the fully upholstered seat shells, are suitable for management and conference environments areas that reflect a more formal status.

FS 220
The top of the range FS 220 chairs stand for luxurious comfort and a certain cachet. They feature steel frame upholstered bodies with meshed coverings and moulded in foam, superbly made covers and fully upholstered armrests.

FS Management. 21 range

Classical. Modern. Enduring.

The FS-Line was launched back in 1980. And its highly flexible, unitary seat- and backrest shell are still considered a global milestone in dynamic seating. With the elegant curve of the swivel arms, the appealingly spacious seat, slim contours and compact mechanics, the design also wrote history. A more attractive ergonomic office chair, so lacking in complexity, is difficult to imagine. Well-known publishing house "form" devoted a whole issue of its "Design Classics" series to the FS-Line. So it's not surprising that the FS-Line's Executive models have been popular with decision-makers in the worlds of politics and business for decades.

The traditional shape has been carefully honed for the new FS Management models. Eight centimetres have been added to the backrest height and the thickness of the upholstery is reduced too. The new upholstery technique with elastic, upholstered steel frame and extra padding offers superlative comfort. And finally, the covers are stitched, lending the chairs a contemporary, casual look.

FS Management.
Design: Klaus Franck, Werner Sauer

Model 220/92
A classic chair, with new, slimmer contours and superb comfort.

The FS Management models are available as office or conference chairs in two backrest heights, exclusively with bright chromium-plated frames and robust leather. After all, we want them to keep their owners company for decades. FS Management is extremely good value, reflecting current trends in management styles and dynamic seating. As a result, it is the ideal choice when a touch of gravitas, as well as healthy and comfortable dynamic seating, are required.
